

**Adelaide Hoodless Rose**  
*Rosa 'Adelaide Hoodless'*

Height: 3 feet

Spread: 3 feet

Sunlight: ○

Hardiness Zone: 2a

Group/Class: Parkland Rose

**Description:**

A Parkland series rose, very floriferous featuring semi-double large red clusters over the entire season; bushy, upright and spreading habit; hardy and resistant to disease; a good all-round garden shrub; requires full sun and well-drained soil.

**Ornamental Features**

Adelaide Hoodless Rose is smothered in stunning red flowers with yellow eyes at the ends of the branches from late spring to late summer. The flowers are excellent for cutting. It has dark green foliage throughout the season. The oval compound leaves turn yellow in fall. The fruits are showy orange hips displayed from mid to late fall.

**Landscape Attributes**

Adelaide Hoodless Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It has no significant negative characteristics.

Adelaide Hoodless Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

### **Planting & Growing**

Adelaide Hoodless Rose will grow to be about 3 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
