

**Holmstrup Cedar**  
*Thuja occidentalis 'Holmstrup'*

Height: 8 feet

Spread: 4 feet

Sunlight:

Hardiness Zone: 2b

**Description:**

A compact, upright evergreen, with dense foliage in vertical sprays; pointed at tip, which remains a rich deep green year round; ideal size for small-scale articulation; hardy and adaptable; tolerates light shade more than others of this species.

**Ornamental Features**

Holmstrup Cedar is a dwarf conifer which is primarily valued in the landscape or garden for its rigidly columnar form. It has forest green evergreen foliage which emerges light green in spring. The scale-like sprays of foliage remain forest green throughout the winter.

**Landscape Attributes**

Holmstrup Cedar is a dense multi-stemmed evergreen shrub with a narrowly upright and columnar growth habit. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a relatively low maintenance shrub, and usually looks its best without pruning, although it will tolerate pruning. It has no significant negative characteristics.

Holmstrup Cedar is recommended for the following landscape applications;

- Hedges/Screening
- General Garden Use

**Planting & Growing**

Holmstrup Cedar will grow to be about 8 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This is a selection of a native North American species.
