

Navigator Ornamental Pear
Pyrus 'DurPSN303'

Height: 25 feet

Spread: 12 feet

Sunlight: ☉

Hardiness Zone: 2a

Description:

An upright oval accent tree, excellent for home landscape use, featuring a multitude of showy white flowers in spring; green leaves in spring and summer; excellent yellow to red fall colour. Rarely produces fruit

Ornamental Features

Navigator Ornamental Pear is bathed in stunning clusters of white flowers with pink anthers along the branches in mid spring before the leaves. It has dark green deciduous foliage. The glossy heart-shaped leaves turn an outstanding red in the fall.

Landscape Attributes

Navigator Ornamental Pear is a dense deciduous tree with a shapely oval form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This tree will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It has no significant negative characteristics.

Navigator Ornamental Pear is recommended for the following landscape applications;

- Accent
- Shade
- Vertical Accent

Planting & Growing

Navigator Ornamental Pear will grow to be about 25 feet tall at maturity, with a spread of 12 feet. It has a low canopy with a typical clearance of 3 feet from the ground, and should not be planted underneath power lines. It grows at a fast rate, and under ideal conditions can be expected to live for 50 years or more.

This tree should only be grown in full sunlight. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
