

## Sundancer Poplar

*Populus 'ACWS151'*

Height: 40 feet

Spread: 10 feet

Sunlight:

Hardiness Zone: 3a

Other Names: AC-Sundancer, Hybrid Poplar

### Description:

A columnar seedless variety that's fast growing and tolerant of the worst growing conditions; this variety has high disease resistance; it also has an aggressive root system, so don't plant near houses; makes a great windbreak or quick shade tree

### Ornamental Features

Sundancer Poplar has rich green deciduous foliage on a tree with a columnar habit of growth. The large heart-shaped leaves turn yellow in fall.

### Landscape Attributes

Sundancer Poplar is a deciduous tree with a narrowly upright and columnar growth habit. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.

This tree will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Invasive

Sundancer Poplar is recommended for the following landscape applications;

- Shade
- Vertical Accent
- Hedges/Screening
- Windbreaks and Shelterbelts

### **Planting & Growing**

Sundancer Poplar will grow to be about 40 feet tall at maturity, with a spread of 10 feet. It has a low canopy with a typical clearance of 3 feet from the ground, and should not be planted underneath power lines. It grows at a fast rate, and under ideal conditions can be expected to live for 60 years or more.

This tree does best in full sun to partial shade. It is very adaptable to both dry and moist locations, and should do just fine under average home landscape conditions. It is considered to be drought-tolerant, and thus makes an ideal choice for xeriscaping or the moisture-conserving landscape. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
