

Skyrocket Upright Juniper
Juniperus scopulorum 'Skyrocket'

Height: 10 feet

Spread: 4 feet

Sunlight: ☉

Hardiness Zone: 3a

Description:

A stately narrow columnar form, with soft silvery blue needle-like foliage all season long; a curious, almost formal tall evergreen hedge when planted in a row

Ornamental Features

Skyrocket Upright Juniper is a dwarf conifer which is primarily valued in the landscape or garden for its rigidly columnar form. It has attractive powder blue evergreen foliage. The scale-like sprays of foliage are highly ornamental and remain powder blue throughout the winter. It produces silvery blue berries from late spring to late winter.

Landscape Attributes

Skyrocket Upright Juniper is a multi-stemmed evergreen shrub with a narrowly upright and columnar growth habit. It lends an extremely fine and delicate texture to the landscape composition which can make it a great accent feature on this basis alone.

This is a relatively low maintenance shrub, and usually looks its best without pruning, although it will tolerate pruning. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Skyrocket Upright Juniper is recommended for the following landscape applications;

- Accent
- Vertical Accent
- General Garden Use

Planting & Growing

Skyrocket Upright Juniper will grow to be about 10 feet tall at maturity, with a spread of 4 feet. It tends to be a little leggy, with a typical clearance of 2 feet from the ground, and is suitable for planting under power lines. It grows at a slow rate, and under ideal conditions can be expected to live for 70 years or more.

This shrub should only be grown in full sunlight. It is very adaptable to both dry and moist growing conditions, but will not tolerate any standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for xeriscaping or the moisture-conserving landscape. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selection of a native North American species.
