

Crimson King Norway Maple*

Acer platanoides 'Crimson King'

Height: 40 feet

Spread: 35 feet

Sunlight: 

Hardiness Zone: 4a

Description:

Coarse burgundy leafed tree, holding its foliage colour well throughout the season; a dense shade tree best used as a prominent colour accent; wind sheltered sites only, borderline hardy and may experience consistent winter die back

Ornamental Features

Crimson King Norway Maple has attractive burgundy deciduous foliage on a tree with a round habit of growth. The lobed leaves are highly ornamental and turn an outstanding deep purple in the fall. It is bathed in stunning corymbs of lemon yellow flowers along the branches in early spring before the leaves.

Landscape Attributes

Crimson King Norway Maple is a dense deciduous tree with a more or less rounded form. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.

This is a relatively low maintenance tree, and should only be pruned in summer after the leaves have fully developed, as it may 'bleed' sap if pruned in late winter or early spring. It has no significant negative characteristics.

Crimson King Norway Maple is recommended for the following landscape applications;

- Accent
- Shade

Planting & Growing

Crimson King Norway Maple will grow to be about 40 feet tall at maturity, with a spread of 35 feet. It has a high canopy with a typical clearance of 7 feet from the ground, and should not be planted underneath power lines. As it matures, the lower branches of this tree can be strategically removed to create a high enough canopy to support unobstructed human traffic underneath. It grows at a medium rate, and under ideal conditions can be expected to live to a ripe old age of 100 years or more; think of this as a heritage tree for future generations!

This tree should only be grown in full sunlight. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments, and will benefit from being planted in a relatively sheltered location. This is a selected variety of a species not originally from North America.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
