

## **Radiant Flowering Crab\***

***Malus 'Radiant'***

Height: 16 feet

Spread: 16 feet

Sunlight: ☉

Hardiness Zone: 3a

Other Names: Roseybloom, Crabapple

### **Description:**

New foliage is reddish in colour maturing to green. Red buds open into deep pink flowers in spring followed by attractive bright red fruit that persists into winter; susceptible to apple scab, needs well-drained soil and full sun

### **Ornamental Features**

Radiant Flowering Crab is covered in stunning clusters of fragrant rose flowers along the branches in mid spring, which emerge from distinctive dark red flower buds before the leaves. It has attractive coppery-bronze-tipped dark green foliage which emerges brick red in spring. The pointy leaves are highly ornamental and turn yellow in fall. The fruits are showy red pomes carried in abundance from early to late fall.

### **Landscape Attributes**

Radiant Flowering Crab is a deciduous tree with a more or less rounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance tree that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease

Radiant Flowering Crab is recommended for the following landscape applications;

- Accent
- Shade
- General Garden Use

#### **Planting & Growing**

Radiant Flowering Crab will grow to be about 16 feet tall at maturity, with a spread of 16 feet. It has a low canopy with a typical clearance of 3 feet from the ground, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for 50 years or more.

This tree should only be grown in full sunlight. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
